DETAILED ACTION

Claim Objections

1. Claims 3, 6, and 18 are objected to because of the following informalities:
 - a. The word “inclusive” in claim 3 is considered unnecessary. The claim is interpreted to mean the thickness is from 5 to 20 angstroms, which includes both endpoints 5 and 20.
 - b. The word “selected” should be inserted in claim 6 between “in formula 1 is” and “from the group consisting of”.
 - c. In claim 18, “fro a” should be replaced with “from the”.Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. The meanings for variables x, y, and z are indefinite. Each variable is recited as being *between* two integer endpoints, but the specific compounds according to formula 1 recited in the dependent claims have variable values at the *endpoints* of the recited number ranges. The range of numbers for each of variables x, y, and z should be recited more clearly so as to *include* the endpoint numbers 1 and 2 for x, 1 and 2 for y, and 2 and 3 for z in the recited ranges. In

Art Unit: 1774

addition, the word "inclusive" is unnecessary if the ranges are clearly recited and should be deleted. Clarification and/or correction are required.

5. Claims 2 and 8-11 are indefinite because they recite compounds that are not within the definition of formula 1 as currently recited. It is suggested that the variables x, y, and z for formula 1 in claim 1 be amended as discussed in the above paragraph to include the values represented by the compounds in claims 2 and 8-11.

6. In claim 12, the meaning of "electron-hole bonds" is not clear and the term is not known to have an accepted meaning in the art. Accordingly, the term renders the claim indefinite. It is suggested that "at electron-hole bonds" be deleted from claim 12.

Allowable Subject Matter

7. Claims 1-18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. The prior art fails to teach or to suggest the use of a compound according to formula 1 in an electron injecting layer in an organic electroluminescent device further comprising the very specific layers as recited.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
